

LORENZO MIGUEL S. BERNAD

SENIOR ANALYTICS ENGINEER / SENIOR AUDITOR | SQL • PYTHON • POWER BI • MICROSOFT CLOUD SERVICES

Mandaluyong City, Metro Manila, Philippines • +63 956 084 7104 • lmsbernad@gmail.com

LinkedIn: www.linkedin.com/in/lorenzo-bernad-a8a8831a1

Senior Auditor specializing in audit analytics, data engineering, and business intelligence, with hands-on experience in SQL, Python, Power BI, and Microsoft cloud services across banking and regulated environments. Builds end-to-end analytics solutions—from data extraction and validation to dashboards highlighting exceptions, control gaps, and performance risks.

AREA OF EXPERTISE

- SQL (Data Analysis)
- Python (Data Automation & Analytics)
- Power BI (Dashboards & KPI Reporting)
- Audit Analytics & Risk Reporting
- Data Governance
- Microsoft Cloud Services

KEY ACHIEVEMENTS

- Built SQL- and Python-based data pipelines to extract, clean, and validate banking data for audit and risk reviews
- Developed multiple Power BI dashboards for KPI tracking, exception monitoring, and anomaly detection
- Automated recurring MI and audit reports, improving consistency and reducing manual preparation
- Partnered with audit and business teams to translate control requirements into analytics solutions

PROFESSIONAL EXPERIENCE

Senior Auditor, Bank of Commerce

Aug 2025 - Present

- Support audit and business reviews by extracting, cleaning, and validating banking data using SQL and Python; turn raw tables into analysis-ready datasets with documentation and quality checks
- Build Power BI dashboards and recurring MI reports (KPIs, trends, exception monitoring) to help stakeholders spot anomalies, control gaps, and performance issues
- Deliver ad-hoc analytics (segmentation, reconciliations, root-cause analysis) partnering with audit teams and business units

Senior Health Management System Specialist, Proview Global Inc.

Oct 2019 - July 2025

- Developed analytical reports for healthcare clients to support operational and management decision-making
- Collaborated with account managers to translate business requirements into data-driven reports
- Improved reporting efficiency by optimizing report generation processes

Data Analyst, Scriptmed Inc.

Apr 2025 - Aug 2025

- Develop automated incentive reports tracking sales performance, commissions, and bonuses
- Create stock reports analyzing inventory levels, turnover rates, and supply chain trends
- Perform data cleansing and validation, identifying and correcting anomalies to ensure 100% accuracy in the report

Research Assistant, Department of Trade and Industry

Aug 2019 - Oct 2019

- Prepare analytical reports for healthcare clients, reducing decision-making time

Intern, Aviso Valuation & Advisory Corp

2019

- Designed and deployed real-time Power BI dashboards analyzing financial data of different clients

Intern, UnionBank of the Philippines

2018

- Delivered customized reports for internal stakeholders and external clients

PROJECTS & PORTFOLIO

Audit Exception Monitoring Dashboard (Power BI)

- Designed an end-to-end Power BI dashboard to monitor audit exceptions, control breaches, and key risk indicators
- Modeled and transformed audit and transactional datasets to support drill-downs by business unit, process, and risk category
- Built trend analysis and exception flags to help auditors quickly identify anomalies
- Focused on usability and performance to support recurring audit and management reporting

SQL Analytics Engineering Project

- Optimized SQL queries and views to extract, clean, and standardize large transactional datasets
- Implemented data validation checks (completeness, accuracy, duplicates) to ensure analysis-ready outputs
- Designed analytics-ready tables to support BI dashboards and audit use cases
- Applied documentation and versioning practices to improve transparency and re-usability of queries

Python Data Automation Project

- Built Python scripts to automate recurring data extraction, cleaning, and reconciliation tasks
- Implemented validation logic and exception handling to flag data quality issues
- Reduced manual processing time by streamlining repetitive reporting workflows
- Structured scripts for maintainability and scalability across multiple reporting cycles

Entrepreneurial Experience

Co-Founder, Infoseer Consulting

- Co-founded a data analytics and AI consultancy that helps Philippine businesses use their data to make better decisions
- Lead client relationships and business strategy — translating what clients need into practical, affordable analytics solutions

EDUCATION

Master in Applied Business Analytics

Jun 2024 - Aug 2026

University of Asia & the Pacific

BS in Business Administration (Specialization in Business Analytics)

Aug 2015 - Aug 2019

University of Asia & the Pacific

PROFESSIONAL DEVELOPMENT & TRAINING

- Awarded “Best Research Paper” titled “Digital Transformation Meets Green Innovation: A Literature Review of Digital Transformation's Role in Telcos’ Sustainable Management and Business Practices” in the 6th Northern Philippines Business Research Conference 2025
- Attended “Data Ethics” seminar hosted by Mr. Dominic Ligot in University of Asia & the Pacific
- Attended the UA&P x Eskwelabs Hackathon 2025 in University of Asia & the Pacific

SOFT SKILLS

- Clear Communicator • Quick Learner & Adaptable • Solution-Oriented Problem Solver • Collaborative Team Player • Meticulous & Detail-Focused
